

Choose ONE task to complete each half term.

Weather around the world — bring in to school on Friday 18th May    Grace Darling — bring in on Friday 13th July

Create a weather diary over several weeks, showing minimum and maximum temperatures, rainfall, sunshine and everything in-between!

Create a model of a lighthouse.

Use some recycled materials in your model.  
Can you include a working light?

Draw a detailed plan for a mini beast hotel showing the materials you would use and special features.

# St Patrick's Class

## Home Learning

### Summer 2018

Create a piece of artwork that represents one type of weather you have seen during the spring and early summer.

Make a fact file about a creature that you might find living near a UK beach. Find out what its habitat is, what food it eats and how it has adapted to its environment.

Write your own story about an adventure in a country with a different climate from the UK.

Find out about the first lighthouses. Where were they situated? Who built them? What are they made from?

Design a lifeboat that is able to go out in all types of weather to rescue people from sinking boats. What materials will you use? What safety features will it have?

Visit a local seaside museum and learn more about what effect the weather has had on the environment and people's lives. Present your findings in an interesting way.
