

Home Learning Project

Year 3

Autumn 2021

Build a shelter for a Neolithic or Mesolithic family. Perhaps use natural materials as they would have done!

Design a quiz about Prehistoric Britain to share with the class. Make sure you know the answers!

Imagine you have been out hunting and gathering food. What three course meal could you prepare with the food you have found? Write a recipe or design a menu using your ingredients.

Look at some examples of objects from early human history. Visit **The British Museum** website using the following website address: <http://www.teachinghistory100.org/browse/curriculum/2/> Select the history topic "Britain: The Stone Age to the Iron Age."

Click on the pictures to find out what the items were used for and how were they made. Be creative in how you share your learning!

Design and make an outfit for a human living in Prehistoric Britain. What materials would they have used?

Design and make your own ancient stone circle or make a replica of Stonehenge.

Try mixing up your own cave paint using oil and different types of mud, clay or ground up charcoal

These drawings were found in La Pileta cave in Spain and could be up to 25000 years old.

What do you think these drawings represent?

Could they be about counting things? What might Stone Age people count? Might they be the earliest known number patterns?

You could try and make up your own way of recording counting.

During this term I would like you to choose two projects to undertake. The first should be brought into school to share in the week beginning 6.10.21 and the second project brought in during the week beginning 8.12.21.

I am also very happy for you to create your own project to share.
Have fun!

- Write your own Stone Age adventure. Design a front and back cover for your story.
- Write a diary about a day in the life of a Stone Age person.
